About Us

Our company has been dealing with the production and trade of onions and onion seeds since the 1950s, also incorporated in 1996, "AKA Ziraî Ürünler Tohumculuk Tic. Ltd." got its name.

Since 1996, With serious approach and forward-looking seed production, we took our place in the market by making the necessary investments.

With more than 60 years of experience, we are always with our farmers. With a leading breeder organization in the sector that we have a contract with more standard new variety more suitable for country conditions we continue our work.

Our main target is to provide more opportunities to our dealers and farmers , to offer more standard seeds of good quality, to be reputable, permanent and innovative in the sector as in the past. Its is to make the necessary investments for our business.

Our seed production places are in the most suitable for seed production that in the Southern Marmara region of Turkey.
